

Linda Cowan - Buffalo

To improve my mental health I would like to expose how qualifying Title VII Civil Rights Cases are being used to abuse African Americans in the Buffalo Federal Court. I have been abused by this court and have been trying to get my case that was in the settlement process reopened. My case was illegally dismissed to prevent the Defendant from being charged with discrimination and prevent them from having to pay the judgment. This court is discriminating against African Americans in order to prevent the violators of discrimination from being charged. I have solid evidence of discrimination, abuse of power, corruption, conspiracy to illegally dismiss qualifying Title VII cases, obstruction of justice and downright hatred against African Americans. This is one of the reasons that racism is running so out of control here. Justice denied by this court is an abuse to African Americans. I have continuously requested an investigation into this abuse from the FBI and DOJ and keep getting denied. This injustice against African Americans needs to be exposed. Please investigate. I have solid proof.
